HOOP5

DFARS & CMMC
COMPLIANCE

Contractors and subcontractors for the Federal Government are required to comply with a number of strict cybersecurity regulations such as CMMC and DFARS. A failure to comply with these regulations can mean a loss of government contracts or an inability to obtain them.

Cybersecurity regulation compliance is especially important for companies contracting with the DoD. This is because DoD data can be extremely sensitive and compromising it can have direct and serious national security threats.

HERE TO HELP.

Hoop5 has an extensive knowledge of the construction industry as well as the cybersecurity requirements imposed by the Federal Government. We understand that the cybersecurity regulations, requirements, and framework might seem like an overwhelming task. Hoop5 is prepared to help you navigate the complexities of cybersecurity, address any specific security challenges, and provide overall guidance to ensure that your company is prepared to respond and comply with any DFARS and CMMC requirements.
